TOP-DRESSING TIME IS HERE FOR PASTURE AND HAY

Your pasture and hay crops are valuable potential profit producers. Yet in the spring rush, they are usually the most neglected of your acres.

Due to the extremely wet fall and winter thus far, we believe there will be an unusual demand for fertilizer this spring.

Trim this potential loss by fertilizing pasture and hay now!

Our Liquid equipment is ideal for top-dressing sod crops because, it is LIQUID equipment. This means that every drop is the same. This assures you that every inch of grass land gets the same fertilizer. We have modern trucks and skilled personnel to serve you.

Pasture and hay are sod crops. This sod prevents loss of plant nutrients due to run-off and erosion. Fertilizing this sod during its dormant stage will reduce any fertilizer salt damage and get these crops off to a fast start as the growing season begins.

LIQUID equipment and ARCADIAN SLF LIQUID FERTILIZERS are right as rain for your pasture and hay. Contact us today because it's top-dressing time! We can get your order on the books and apply it on frozen ground, or as soon as it is dry enough.
